the

SOUND BAR

BRAND GUIDE 2023

LOGO: USAGE & GUIDELINES

The primary logo for the SOUNDBAR is the wordmark, with the stack logo being used interchangably when necessary. The jacket logo and disc icon are abbreviations of the primary logo and are used in situations where space is limited.

Wordmark

the SOUNDBAR

the SOUND BAR

Stack Logo

Jacket Logo

Disc Icon

LOGO: ALTERNATE VERSIONS

The primary wordmark, stack, and jacket logos must only be the provided BLUE, BLACK, and WHITE. The jacket logo must remain black and white and has no color variation.The disc icon may be any of the official brand colors.

Logo Variations

Disc Variations

LOGO: AREA OF ISOLATION

Area of Isolation: *The clear space or area of isolation around the logo. Clear space is the area surrounding the logo that must always be free of any text or graphic elements.*

It ensures that the logo distinctively stands alone in any environment. It is measured by the height of the disc icon with the wordmark as shown below. The minimum clear space must always be equal to the size of the top left circle on all sides of the logo. Whenever possible, the amount of clear space should be at least slightly greater.

LOGO: SCALING

Acceptable Contrast and Legibility

For proper legibility, a minimum size has been established for the SOUNDBAR logo. This is the smallest sizes at which each logo may be reproduced. The wordmark, stack, and jacket logos, as well as the disc icon, should never appear smaller than their listed widths (scaling proportionately). When reproducing the SOUNDBAR logo, legibility should always be the top priority. There may be occasions, such as on a pen, where it must be reduced to a specified size. This may require special treatment of the logo and needs approval from Jay Shanker and or Alex Quinn before executing any printing or digital placement.

1.5” wide

.75” wide

1” wide

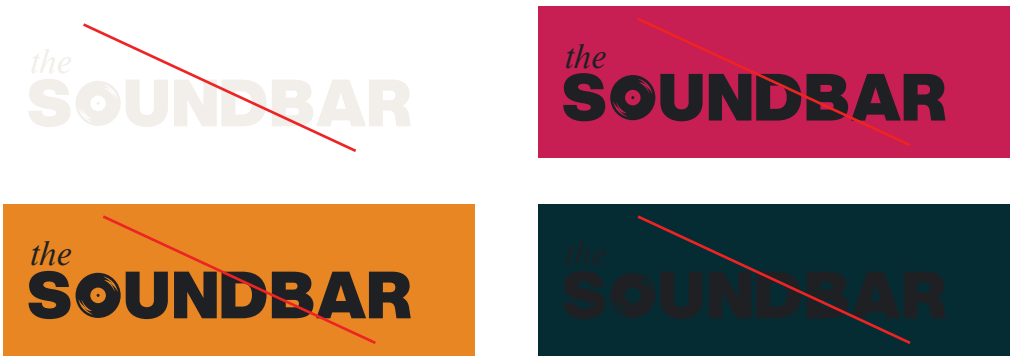
.25” wide

LOGO: APPLICATION

When placing the logo within an application, whether digital or in print, optimal contrast and legibility should always be your first priority. Wherever possible, use the black iterations of the logo. When background activity or contrast prohibits use of the preferred logo, choose an alternate logo version from the family of logos that will maintain brand integrity. Refrain from using a black or navy logo on a dark color.

correct usage

incorrect usage



LOGO: INCORRECT USAGE

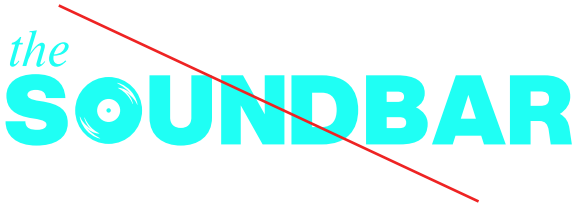
Consistent and proper use of all logo components is essential to maintain the integrity of the SOUNDBAR logo(s). Avoid any alterations to the logo components, including changes to color, size or placement that are not specifically defined as correct use variations.

The examples below show incorrect uses and alterations of the SOUNDBAR logo:

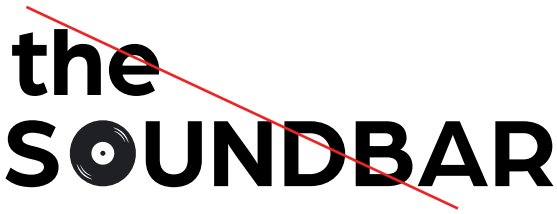
Do not improperly scale or distort the logo

Do not place the logo on busy backgrounds

Do not change the color of the logo with unapproved colors (pg.X)



Do not alter the typography



PALETTE: APPROVED COLORS

Color and memorability are important to the SOUNDBAR brand.
The palette for the logo mark consists of several main colors, listed here in CMYK, RGB and HEX for use in a variety of medias. Colors outside of the palette that may be used if circumstances call for it are white (#FFFFFF) and black (#000000).

PRIMARY COLORS

Primary colors should always be the initial colors considered for any and all design material.

RAISIN BLACK
#1F2024

RGB: 31, 32, 36
CMYK: 14, 11, 0, 86

ISABELINE
#F2EEE9

RGB: 242, 238, 233
CMYK: 0, 2, 4, 5

GUNMETAL
#052C33

RGB: 5, 44, 51
CMYK: 90, 14, 0, 80

SATIN SHEEN GOLD
#C99420

RGB: 201, 148, 32
CMYK: 0, 26, 84, 21

SECONDARY COLORS

Secondary colors should be considered when design constraints allow and or the motivation for the printed/digital material calls for diversity in color.

ROSE RED
#C61752

RGB: 198, 23, 82
CMYK: 0, 88, 59, 22

BLUSH
#E45F8C

RGB: 228, 95, 140
CMYK: 0, 58, 39, 11

FUVLOUS
#E78506

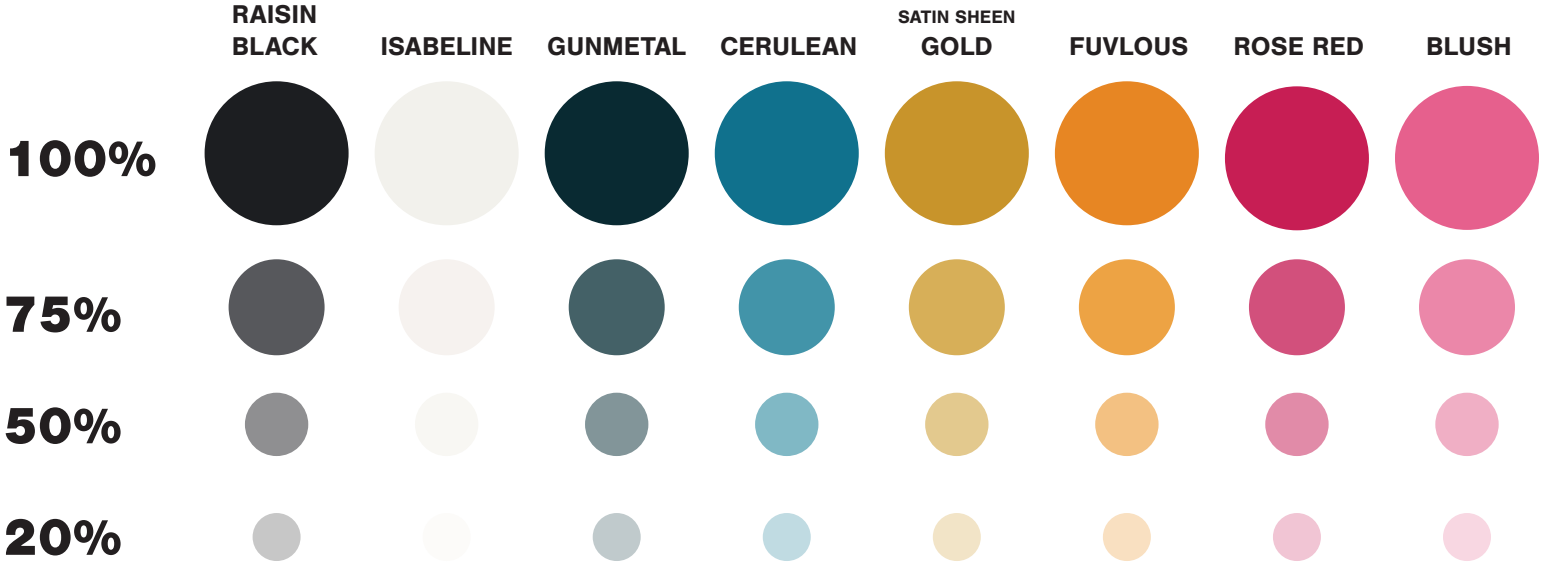
RGB: 231, 133, 6
CMYK: 0, 42, 97, 9

CERULEAN
#03728D

RGB: 3, 114, 141
CMYK: 98, 19, 0, 45

PALETTE: TINTS

In color theory, a tint is the mixture of a color with white, which increases lightness. Tints are useful in printing – they reduce costs by negating the need for additional color plates. The primary and secondary color palettes can be used as tints demonstrated below.



PALETTE: GRADIENTS

Gradients are often used to simulate depth and keep objects from feeling flat. It is advised that the when using gradients, only use each color pairing (gunmetal and cerulean, gold and fuvlous, rose red and blush).

TYPOGRAPHY

The preferred font family for the SOUNDBAR is Nimbus Sans. The secondary preferred family of fonts is Nimbus Roman. Try to create contrast in documents by using a hierarchy of weights and fonts (example below).

A hierarchy of text helps readers scan text that emphasizes some pieces of information and diminishes others. It makes clear where to enter and exit, as well as how to pick and choose sections. Each level of the hierarchy should be signaled by one or more cues applied consistently across a body of text. These cues can be spatial (indents, line spacing or placement on page) or graphic (size, style or typeface color).

HEADER	Nimbus Sans Bold, 30pt
Subheader	Nimbus Sans Regular, 20pt
Pull Quote	Nimbus Sans Bold Italic, 16pt
Bold Copy	Nimbus Sans Bold, 12pt
Body Copy	Nimbus Roman Regular, 12pt
Italic Copy	Nimbus Roman Italic, 12pt
Caption	Nimbus Roman Italic, 12pt

TYPOGRAPHY: FONTS

When using Nimbus Sans and Nimbus Roman in designing print and digital material, the use of italics across all weights is permitted to enhance scanning, create emphasis, or to provide a particular design aesthetic.

ICON USAGE

When appropriate, the icon can be used to create interesting branded imagery through the use of negatives, color variants, and patterns. Use of the icon with the primary and secondary color palettes may be used to allow for a wider use of the icon.

DO NOT use overlayed imagery within the context of the wordmark logo.

ADDITIONAL ASSETS

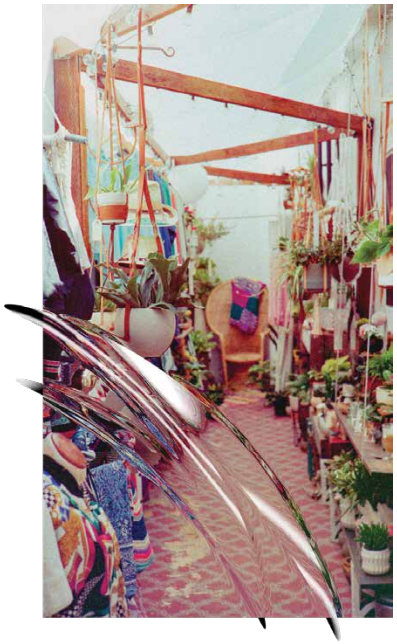
More assets and techniques can be found below that enhance and bring cohesion to the design aesthetic of the SOUNDBAR. Feel free to expand upon these iterations to further develop the SOUNDBAR brand.

SOUNDBAR SWOOSH

The SOUNDBAR swoosh can be found in the light refraction within the main icon of the brand. This iconography can be combined to make an interesting pattern or provide artistic flair. The SOUNDBAR swoosh may be used much more liberally than the main brand components as can be seen on the following page.

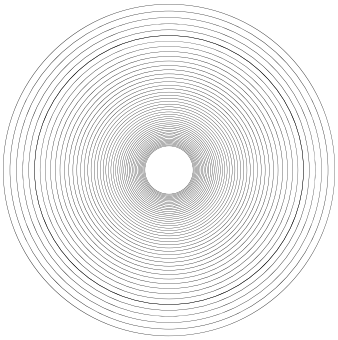
GLASS SWOOSH

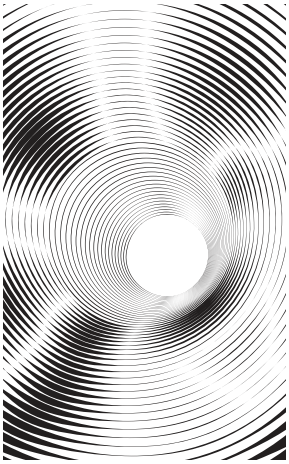
The glass swoosh (or plastic swoosh) intends to emulate the plastic covering on records in the SOUNDBAR and condensing that into the light refraction “swoosh” form.

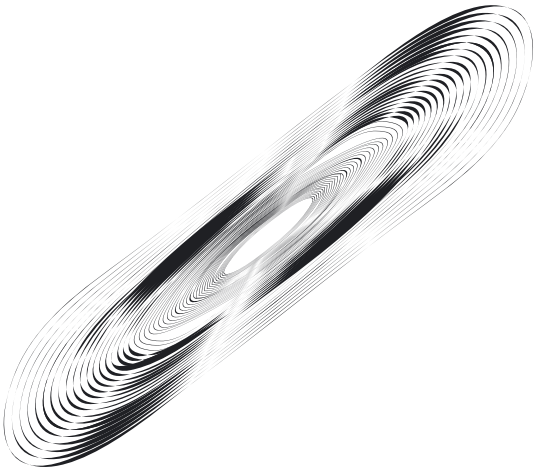


SOUNDWAVE SWOOSH

The soundwave swoosh intends to emulate both the soundwaves and vinyl grooves, while also allowing for some playfulness via changes in the weight and angle of the grooves.

SOUNDWAVES






The soundwave pattern is highly customizable and can be used to bring visual interest to any shape or content area as well as being a negative overlay.
